Under current regulation, in order for a licensee to move from “Inactive” status back to “Active” status, the individual must complete the “Application for Reinstatement” which includes the following:

- 1) Complete application
- 2) Fees
- 3) Any court orders / disciplinary records which may have occurred since last time license was active
- 4) Proof of 30 hours CE in last 24 months from date of application (vets), or 6 CE in last 12 months from date of application (vet techs)
- 5) AAVSB VAULT Credential Report
- 6) Licensure Verification letter(s) from every jurisdiction in which the licensee has ever been licensed (to verify if there have been any disciplinary actions)
- 7) FBI background check results

To provide an incentive for licensees to use the “Inactive” status and keep their license in good standing with the board, KBVE offers the following benefits when a licensee wishes to reinstate to expedite the reinstatement process. If a discipline is disclosed in the application or by determination of the KBVE, waived requirements may be added back in as a condition of licensure.
